

OneVA Pharmacy Project

Business Information Technology Solutions, Inc.

Training Session Materials

Deliverable 0002AG

9/29/2014

Agenda

- **Introductions**
- **Training Session (Live Meeting)**
 - View Remote Orders
 - Remote Refills
 - Remote Lock Orders
 - Remote Reports
 - PM and Vista Exceptions
- **Project Close-Out Activities**
 - **Review of recent deliverables**
 - Installation Guide
 - User Manual
 - Test Plan
 - Training Materials
 - **Review of Contractual Prototype Requirements**
- **Open Discussion**

Contractual Prototype Requirements

Develop a multi-site virtual VistA environment in VA's Innovations Sandbox to mimic multiple different VA sites (minimum of three different VA sites) with different VistA systems (one site would be considered the local site and the other sites would be considered the remote site).

Contractual Prototype Requirements

Develop the functionality to access the patients' remote site prescription information in order to take action (such as request a refill or print a prescription [RX] label for a refill) on any **active** prescription(s) available in the remote site patient pharmacy medication profile.

Contractual Prototype Requirements

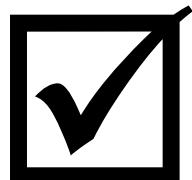

Develop the ability to run a report for both the local site and the remote sites that captures an itemized list of what prescriptions were filled at another site and for which patients; this report or series of reports should also be able to capture total cost for each prescription filled and provide a total cost summary for prescriptions filled for a selectable date range.

Contractual Prototype Requirements

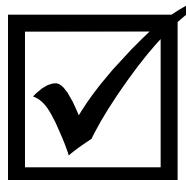

Develop and demonstrate the exchange of patient sensitive information between VA sites in a secure manner in accordance with standard VA regulations for privacy.

Other Features

Display remote systems suspended prescriptions and prescriptions on hold –
Please note that this is outside of the contractual prototype requirements.

Other Contractual Deliverables

Conduct functional, integration, and regression testing to validate that requirements were met.

Deliverables:

Test Plan

Test Report

Develop user manuals for the interim prototype and update the documentation for the final prototype.

Deliverables:

User Manuals

Installation Guide

Training materials for the final prototype

Deliverables:

Training Session and Materials

OPEN DISCUSSION

OneVA Pharmacy User Training
